

Unit B7

Description

This concrete portal frame industrial unit with internal blockwork and insulated clad exterior contains significant warehouse accommodation with total space of 10,014 sq ft.

On entering the unit through the insulated vehicular door to the front of the property you are confronted with a substantial warehouse which benefits from a solid concrete floor.

To the right of the vehicular door, separated by an office corridor, is located a reception, 6 ground floor offices, a kitchen, and toilets, including separate workshop toilets.

Above the office block sits a substantial mezzanine for further flexible storage space. A second vehicular door provides side access to the unit ideal for goods in/out.

Size 10,014 sq ft

This concrete portal frame industrial unit with internal blockwork and insulated clad exterior contains significant warehouse accommodation.
